CYBERSECURITY

Grace Bonanno, a local college professor, will explain to us the nature of cybersecurity and the world of experts and criminals; cybersecurity criminals versus cybersecurity specialists.

Cybersecurity risks and threats are ever present in our world today. Network infrastructures and the Internet are increasingly vulnerable to both physical and cyber attacks. Since cyber criminals can access networks from anywhere in the world, vulnerabilities in our network infrastructure are being exploited by sophisticated cyber criminals.

A cybersecurity specialist must think and behave like a cyber criminal; they must possess the same skills as hackers in order to protect against attacks. Come and learn to protect your personal, valuable data.

For further information, contact Tom Osbeck at 914-720-1075 or email programs@wpcug.org.

The Maker Faire

Seven members joined together to enjoy the Maker Faire in late September at the World's Fair Grounds in Queens. More club adventures are being planned. We'll let you know when and where. Stay tuned!
