

Plan now to attend!

PHOTOSHOP ELEMENTS 2018

This month Jim Iscaro will be giving a presentation on Photoshop Elements 2018.

Photoshop Elements is a time-tested photo-editing application. Over the years it has evolved into a sophisticated, yet easy to use program. This version of Elements is another giant step forward with many new features that add powerful tools and keeps its excellent reputation.

Some of its new features are:

- Auto Curate—to find the best photos
- Open Closed Eyes
- Replace Background
- Overlay Effect
- Double Exposure
- Auto Selection—simply drag over a subject to select it.
