Understanding the Different Categories of Artificial Intelligence

Gary Olson will discuss the use of the term AI—Artificial Intelligence—and the varied forms of technology AI is applied to.

Gary will define machine learning, deep learning, cognitive computing, and the evolving definition of AI and will present common cases where these technologies are utilized.

Gary Olson is one of the founders of GTOPIA Group, CTO and technology architect of MediaMaestro, a revolutionary new disruptive cognitive intelligence technology in predictive threat analysis for the prevention of violent attacks, terrorist attacks, and situational threat conditions. Gary was named as one of the 2016 Top 20 CIOs and was recently recognized as one of 30 Innovative “CEOs to Watch 2017.”

As an author, speaker, and patent holder, Gary is recognized as a senior technology architect and adviser in the professional media and broadcast industry. His book, *Planning and Designing the IP and File Based Broadcast Facility: A New Puzzle to Solve*, is considered one of the top reference books guiding the broadcast industry in transition to computer centric technology and services.

WPCUG ELECTIONS

Club bylaws require that there be a rotation on the board to ensure a constant flow of new ideas.

Two directors are going off the board at the next election, scheduled to be held during the General Meeting on March 1, 2018.

Plan to attend and to vote as the election is another way to express yourself and your thoughts about the club.
