Electromagnetic Radiation

John Timmer, who holds a doctorate in molecular and cell biology and is *Ars Technica* science editor, will speak about the effects of electromagnetic radiation commonly found in the home environment on the human body, with particular emphasis on frequencies used for modern cellular communication and WiFi.

WPCUG ELECTIONS

Club bylaws require that there be a rotation of board members to ensure a constant flow of new ideas. Two directors are going off the board at the next election, which will be held during the General Meeting on March 4, 2021. Please consider running for one of these positions. Just let any current member of the board know that you are interested.

Plan to vote as the election is another way to express yourself and your thoughts about the club.
