File Explorer in Windows 10

Previously known as Windows Explorer, File Explorer is a file manager application that has been included in some form in all releases of the Microsoft Windows operating system (OS) from Windows 95 onward.

The more recent application has had a makeover with its ribbon bar providing a graphical user interface (GUI) for accessing your files and folders. It is a part of Windows 10 OS for managing your files and folders in all storage locations.

Our presenter, Bill James of APCUG, will discuss the interface and the use of the application.

HOW TO SAVE AND INSTANTLY ACCESS YOUR COVID VACCINE CARD ON YOUR PHONE

Access a digital backup with a single tap right from your home screen.

Your Covid-19 Vaccination Record Card is your current proof that you’ve been vaccinated. You may not feel comfortable toting around a piece of paper without any backup — especially since you can’t even be sure whether to laminate it. So, here’s an easy way to save a backup copy to your phone and keep it accessible with just a single tap from your home screen.

Android Police has the steps and screenshots here. <https://bit.ly/3nhnRLW>

Thank you, Jere Minich, for this excellent advice.
